

If you bill it, they will pay: Energy consumption in the cloud will be irrelevant until directly billed for

How do computers consume energy?

Song et al.[7]: 40% of energy spent
is on cooling

We bill for what we can measure. If we bill for energy it'll be an estimate!

Will customers revolt?

Sustainability: The next NFR

With taxation and incentives I can make Cloud Providers, Vendors, and Customers care about sustainability

By billing the vendor I can make both the vendor and customer responsible.
